COPENHAGEN CONGRESS

# CONNECTING FIELDS

MAY 2ND - 5TH 2013

**SYSTEMIC CONSTELLATION - MOVING  
TOWARDS A SUSTAINABLE FUTURE**

Bringing together the fields of Psychology, Science,  
Mindfulness, Family, Business, Education and Health.

# INVITATION

The Connecting Fields Congress is a major event and a sign of the coming of age of some of the newer disciplines.

It will be a prime occasion to meet people from the international field of Systemic Constellations and to see and listen to leading figures from many different traditions and disciplines, as they share their work and insights.

The program will offer a wealth of ways of applying the work to different social systems. Connecting Fields will also encompass a much wider view, and will serve as a meeting place for other disciplines that are transforming our understanding of human nature and the world at large. It will initiate dialogues with people working at the leading edges of fields as diverse as the Neurosciences, Quantum Physics and the application of Mindfulness in today's society.

In keeping with its international focus, it is significant that the Congress will take place in Denmark, with its distinct culture and language, underlining the multinational and multicultural nature of our time. Copenhagen, the capital of Denmark, is known for its major contributions in Physics, Philosophy, Neuroaffective Psychology, Trauma Healing, the arts and the development of a freedom-loving, openminded and connected people.

We look forward to welcoming you to Connecting Fields Congress, Denmark, May 2nd – 5th 2013.

A handwritten signature in blue ink, appearing to read 'Liv Dhanyo Thommesen'.

President, Connecting Fields Congress  
**Liv Dhanyo Thommesen**

## CONNECTING FIELDS

Our mission is to bring people together, share and inspire each other within existing and new areas of human growth, education, consciousness and development.

### Systemic Constellation

As the inviting field, different ways of applying Constellations will be presented by well-known international facilitators as well as the latest groundbreaking developments.

### Trauma Healing

Leading trauma approaches will be presented with inspiration from many different contributors.

### Mindfulness

There will be the opportunity for morning practice. Keynote speakers and workshops will be offered with both a scientific and a practical focus.

### Attachment & Relationship

The latest understanding about the crucial role of attachment and bonding for the healthy development of the child's brain.

### Neurology

Besides speakers and workshops a lab will run during the congress. Areas like limbic resonance, mirror neurons, etc. will be covered.

### Science & Quantum Physics

Ways of describing the human mind and how patterns come into existence, as well as quantum field theory and the extended mind.

### Pedagogy, Children and Family

Children are the future and the families are the supporting container for the child. How can schools and teaching support our future?

### Business & Organization

A wider focus will look at how organizations can move towards a sustainable future and the importance of seeing businesses as human systems that exist to serve people.
